

## BULK Merchandise Orders

### Administration

An expense is incurred in controlling and directing an organization, but not directly identifiable with financing, marketing, or production operations. The salaries of senior executives and costs of general services (such as accounting, contracting, and industrial relations) fall under this heading. Administrative costs are related to the organization as a whole as opposed to expenses related to individual departments.

MDOC Administrative cost will focus on ensuring that the city stakeholders and tax payers' dollars are being utilized for the highest and best use. The model is simple. Dallas must and should be seeking to get \$5.00 of value out of each dollar invested in its people or property.

# WH REALLY CARES?

## Empowering Women And Girls To LEAD AMERICA

Who Really Cares, understands in order to restore families it must first address the current culture by establishing the **Value of a Life**. WRC believes the missing ingredients have been individuals with a servant mindset, natural intuition for the caring of people and ability to understand or willingness to implement practical solutions. WRC has taken the position, based on the natural abilities of women, their intellect, creativity, and fortitude to make progress; it's time for women to lead our communities and country.

Female Veterans will oversee the mission nationally as they have the discipline and proven commitment to serving their country. Locally they will encourage, empower and inspire women and girls to unite on commonalities in order to move communities forward for the greater good.

Through years of trials and studies, primary data demonstrates when a lack of self-worth and blight dominates a geographical area, it causes generations of hopelessness. Generations of hopelessness directly affect public safety and progress. However, in order to end or reverse hopelessness, and to develop progress, one must have sustainable income and educational opportunities regardless of skill-sets. In local municipalities, a servant-minded public servant will move the cities closer to strengthening and restoring families while eradicating domestic violence and sexual exploitation.

The call to action is for all women to stand together and men to stand with their mothers, sisters, aunts, nieces, and daughters to assist in making America the Best America. American cities and towns since their inception have had male-dominated elected officials and billion dollar annual budgets with little to no progress in addressing major areas such as:

1. Poverty
2. Sexual Exploitation
3. Domestic Violence
4. Income and Educational Opportunities for all

## Child Support Beautification and Family Wellness Pilot

RS is a multi-tiered community beautification; skill development and micro-financing program that seeks to provide individuals with debt relief opportunities and skills to restore value and self-worth. In Phase I we will provide noncustodial parents with the opportunity to pay off child support debt through community beautification, skills development, mentorship and empowerment. This will reduce (and ultimately, eliminate) the amount of unpaid child support in the US while providing the financial security needed to allow families to reach their full potential. Concurrently, we are able to directly improve the living conditions of local residents as they will benefit from the beautification services that are provided by the noncustodial parents.

# WE GOT NOW Rally

## Citywide Arts and Youth Programs

We Got Now Rally is the first platform of its kind to bring Artist, DJ's, Record Labels and Loyal Customers together to support each other, to rebuild broken communities and restore families.

The New Me is an initiative to take individuals that have a musical talent and develop them into a productive socially conscious artist. The New Me mission is to transform the artist from starving to successful, from some stories to many stories and from me to us. The transformation will include the physical and the mindset. Each artist will participate in tours and shows nationally, while being placed on an album called Transformation.

**Building Athletes for Life After Sports (BALAS):** Focuses on Athletes owning and operating a small business primarily in the agriculture field for the following important facts:

- In order to provide them with a real world foundation. So often every young athlete believes they are going to the professional ranks in their prospective sport and when that doesn't happen typically all they knew was the sport and life tends to give them as heavy dose of reality.
- So many of the great high school, collegiate athletes that do go on to achieve professional status end up **BROKE** or in financial ruins because they had no personal sense of finance or managing their own affairs.
- Owning and managing a small business will assist them in handling adversities on and off the court, field and diamond.
- Will add depth, character and substance to them. So many of our athletes young and old have a familiar environment which includes smoking weed and playing play station.

## *Small Business Development*

People are perishing from the lack of knowledge because they are not receiving valuable information in a timely manner. CIH will keep PEOPLE in the KNOW. Community Info Hubs (CIH) serve as the backbone for programs with practical solutions designed to revitalize urban cores and embrace rural America while partnering with Suburban America. Barbershops, Day Cares, Hair Salons and Mom and Pop Restaurants historically are not only gathering places for food and beauty but are also utilized to share information, fellowship, mentor and provide training.

Community Info Hubs benefits will provide income opportunities for those in local communities that desire and need additional income opportunities. Once communities are taught financial literacy, and learn the value of having their limited resources recirculated multiple times within their community, then and only then will progress begin.
